**SPECIFICATION FEATURES**

**Construction**

Revolutionary vented thermal structure constructed of die-cast aluminum greatly improves heat dissipation and performance.

**Thermal Management**

The T5 series provides excellent thermal management by mounting the LEDs to the substantial heat sink of the housing. This enables the Luminaire to withstand higher ambient temperatures and driver currents without degrading LED life. The lens has a UV filter with strong anti-impact properties that provides excellent weather resistance and protects against yellowing.

**Electrical**

LED driver and related electrical components are hard wired and mounted to the housing for optimal heat sinking and operating efficiency. 100- 277V Universal, or 277-480V 50/60Hz, 0-10V dimming, Photocell, motion sensor available to accommodate controls such as dimming and motion sensor step dimming. Operating temperature range of -40°C to 45°C, -40°F to 113°F. Surge protection 20KV available.

**Versatile Mounting Options**

- \*Slip-fitter adjustable with leveling steps
  - \*Slip-fitter adaptor
  - \*Arm fitting with round pole adaptor
  - \*Trunnion
  - \*Photocell Receptacle.
- Comes standard with Slip-fitter

**Finish**

With a minimum of 3-5 millimeter thickness. Finish is oven-baked at 400 °F to promote maximum adherence and finish hardness. All finishes are available in standard dark bronze and custom colors, White, Grey and Black (Call for pricing)

**Optics**

Choice of high-efficiency Optics distributions of Type II, III, IV Optics are precisely designed to shape the light output, maximizing efficiency and application spacing.

Available in 3000K, 4000K, 5000K or 5700K LED color temperatures (CCT) minimum 80 CRI
