

Lamp trying steps

There is a red button switch outside around the lamp,
Turn on the switch on lamp
The lamp will be on after turning on switch
The lamp on means that lamp can be in normal installation

If lamp does not light as the above: Take apart the lamp cover
Check circuit, if connector is dropping out, light on, then install.
If there is no problem of the circuit, light is still not on, please pull up
the connector and plug again then connect observation light
If still not on, contact to custom service for treatment

Installation steps

Using stents according to the picture above, nut on the screw holes and tighten

Turn on the light around in the middle off
